Professional Summary

Detail-oriented Data Analyst with an MSc in Artificial Intelligence and two years of hands-on experience cleaning, transforming, and visualising datasets to support business decisions. Proficient in Python, SQL, Excel, Plotly, Dash, Tableau and Power BI. Proactive and organised professional who builds automated data pipelines, performs statistical analysis, and communicates insights to non-technical stakeholders.

Professional Experience

Data Analysis Intern

April 2026 - Present

HNG Tech (Global technology talent accelerator with 10,000+ developers)

Remote

- Analyse 15+ operational datasets spanning over 50,000 records using Python and SQL, performing trend analysis and anomaly detection that uncovered a 12% revenue leakage and delivered 3 actionable reports to stakeholders
- Design and maintain automated data cleaning and reporting pipelines serving 9 cross-functional stakeholders, improving data accuracy to 98% and reducing manual preparation time by 70%

Data Quality Evaluator

September 2025 - Present

Scale AI (US-based AI data infrastructure company serving OpenAI, Meta, and Microsoft)

Remote

- Assess 100+ data outputs daily using structured frameworks, tracking performance metrics across iterations and documenting findings in clear analytical reports that drive continuous improvement

Data Science Intern

February 2024 - February 2025

National Centre for AI and Robotics, NCAIR (Nigerian federal government AI regulatory body)

Abuja, Nigeria

- Cleaned and standardised fragmented government research datasets totalling 30,000+ records with 7% missing values, building reproducible pipelines in Python and SQL that became the organisation's baseline data processing workflow
- Benchmarked 4 classification model architectures using TensorFlow, achieving a 15% accuracy improvement over the previous baseline and presenting findings to senior leadership in 3 formal reports that shaped the team's research direction

Selected Data Analysis Projects

IBM HR Workforce Attrition Analysis

June 2026

Power BI, Power Query (M), DAX, Excel (VLOOKUP, Pivot Tables)

- Analysed 1,470 employee records to uncover attrition drivers using detailed visualisations by department, salary band, tenure, and satisfaction score
- Built 10 DAX measures including CALCULATE and FILTER functions to compare attrition rates across departments, overtime status and gender revealing that overtime employees were more likely to resign

WHO Global Health KPI Tracker and Regional Dashboard

May 2026

Python, SQL, Plotly, Dash, SciPy, GeoPandas, Matplotlib, Seaborn

- Built an interactive Python dashboard tracking 50+ health indicators across 194 countries with automated data pipelines processing 500,000+ records and filterable views enabling non-technical decision-makers to explore regional trends
- Implemented regression modelling and anomaly detection using SciPy to flag 23 countries with significant life expectancy declines, visualised through GeoPandas choropleth maps that made regional disparities clear to non-technical stakeholders

Olist E-Commerce Customer and Order Analysis

February 2026

Power BI, Power Query (M), DAX

- Cleaned and transformed 96,000+ order records in Power Query, handling null delivery dates, data type mismatches and Portuguese-to-English category translations across 6 relational tables
- Identified that 8.1% of orders were delivered late with northern Brazilian states showing the strongest correlation between slow delivery and low customer satisfaction scores

Education

MSc Artificial Intelligence

2025 - Present

Northumbria University, Newcastle, United Kingdom

Data Analysis, Statistics, Machine Learning, Data Visualisation, Python

BSc Bioinformatics

2019 - 2023

University of Ilorin, Nigeria

Computer Science, Statistics, Mathematics, Data Processing

Technical Skills

Data Analysis: Python (Pandas, NumPy, SciPy), SQL, statistical modelling, A/B testing, trend analysis, EDA, data cleaning, feature engineering

Visualisation and Reporting: Plotly, Dash, Matplotlib, Seaborn, GeoPandas, Excel, Power BI, Tableau

Leadership and Communication

MSc AI Programme Representative (Elected) | Representing over 30 postgraduate students' academic and welfare interests.
